Sahayini - “Helping Every Woman
Find the Support She Deserves.”

- Theme: Rural Women Empowerment
- Team Details: Aastha Yadav, Payal Pal,
Niharika Dubey

Problem Statement: Rural women are unaware of which government schemes they are eligible for due to scattered information, complex rules, and low digital literacy, resulting in missed benefits.

- **Describe the real-world challenge.**

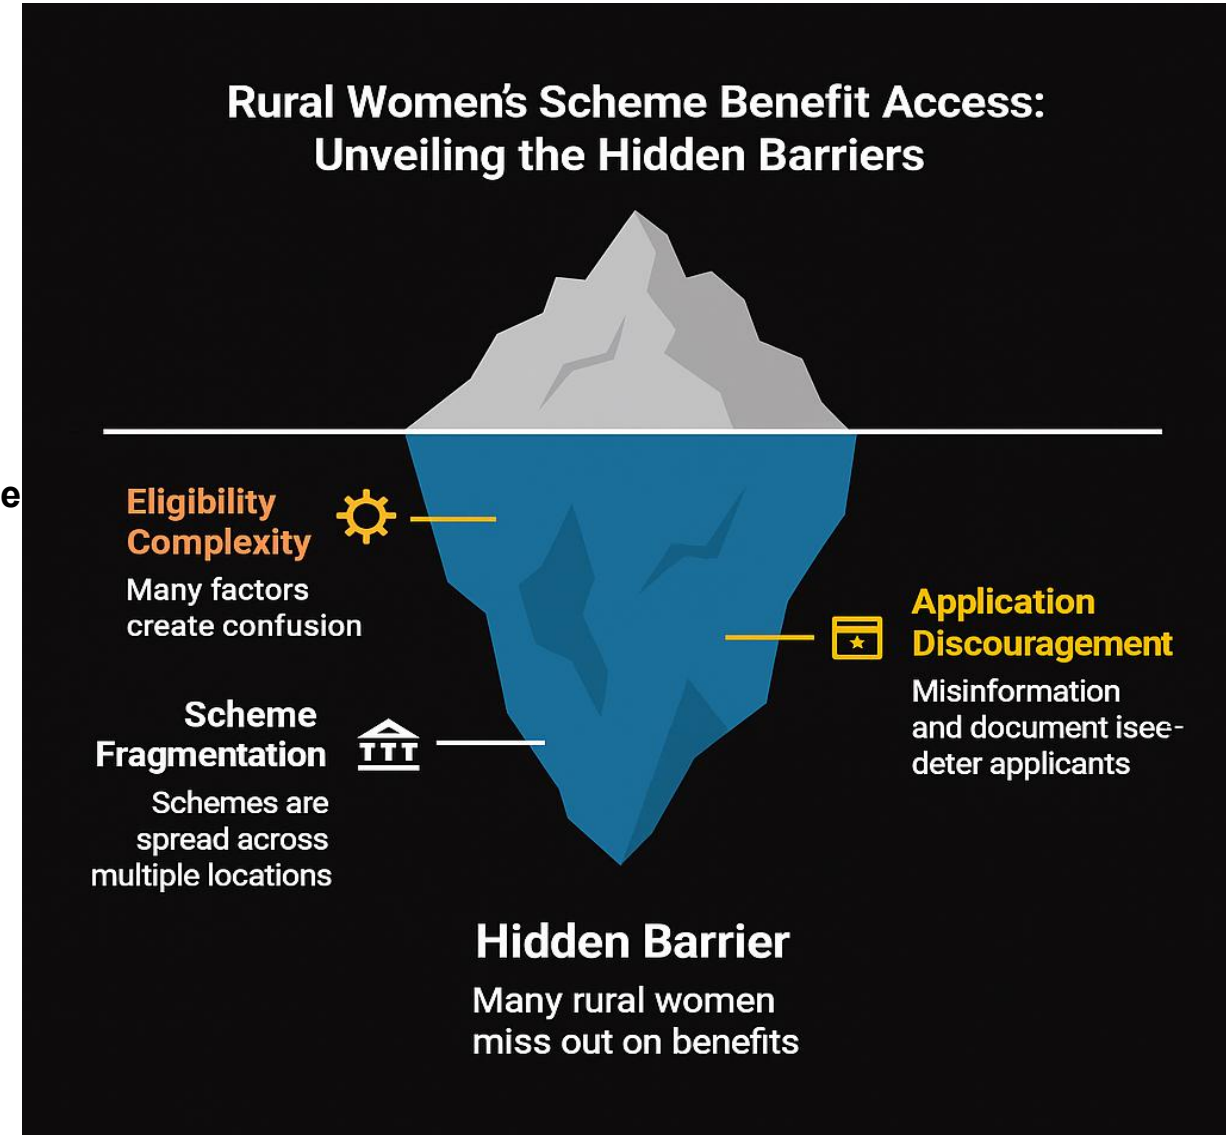

- 70% of eligible rural women never receive scheme benefits despite being qualified.
- Eligibility depends on many factors (**income, caste, occupation, documents**), causing confusion.
- Document issues, **misinformation**, and **time-consuming processes** discourage women from applying.
- Schemes are spread across **multiple websites, departments, and offline offices**.

- **Who is affected? (target users)**

- Rural women with **low** digital literacy.
- Pregnant women and new mothers eligible for **health-related schemes**.
- Widows, single mothers, and elderly women.
- Self-help group (**SHG**) members.

- **Why does it matter? (motivation)**

- Eliminates **fraud** and **exploitation** by agents.
- Helps bridge the gap between **government benefits** and **real beneficiaries**.
- Empowered women uplift entire **families** and **communities**.
- Access to **schemes** directly improves women's income, health, and education.

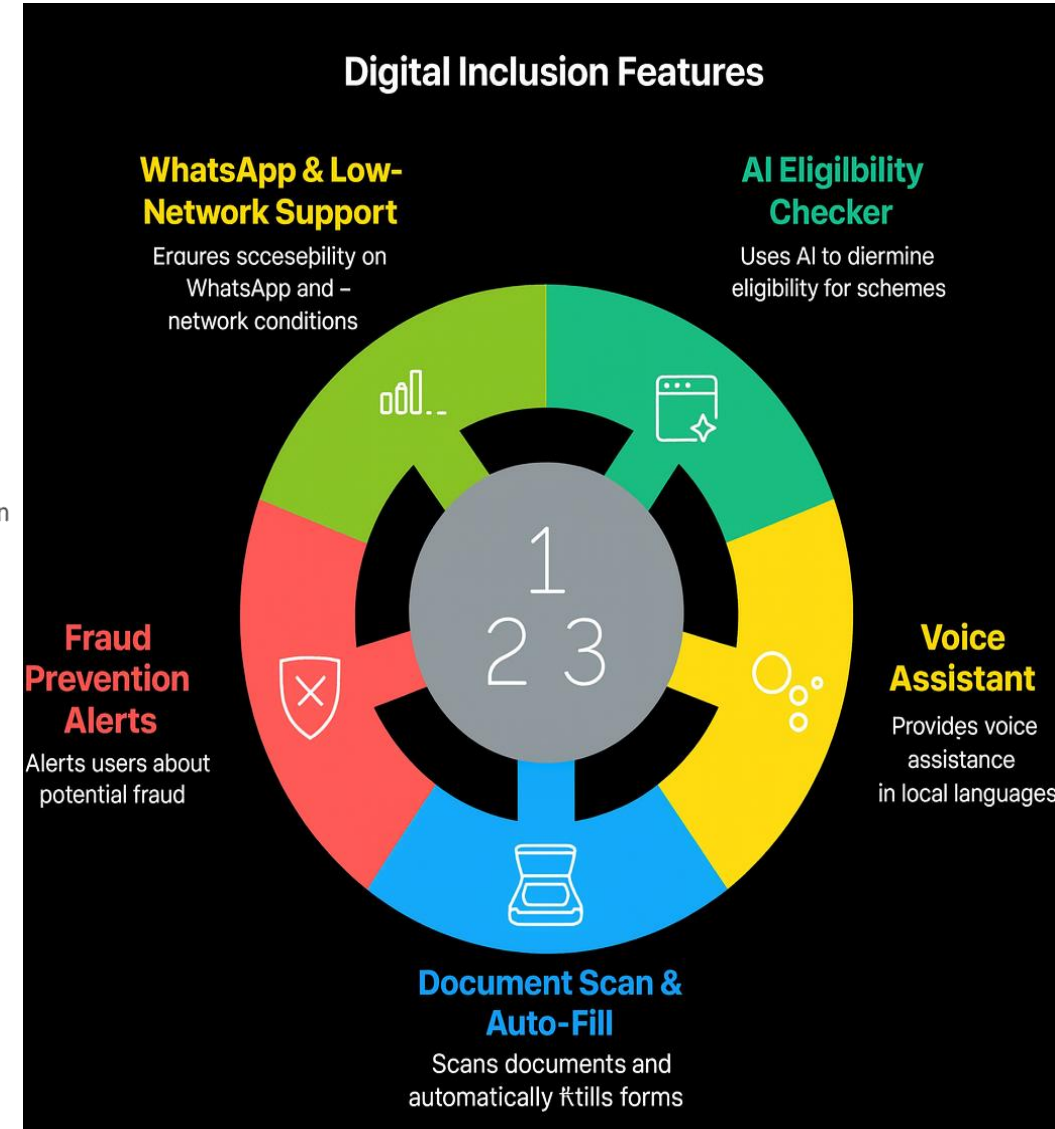

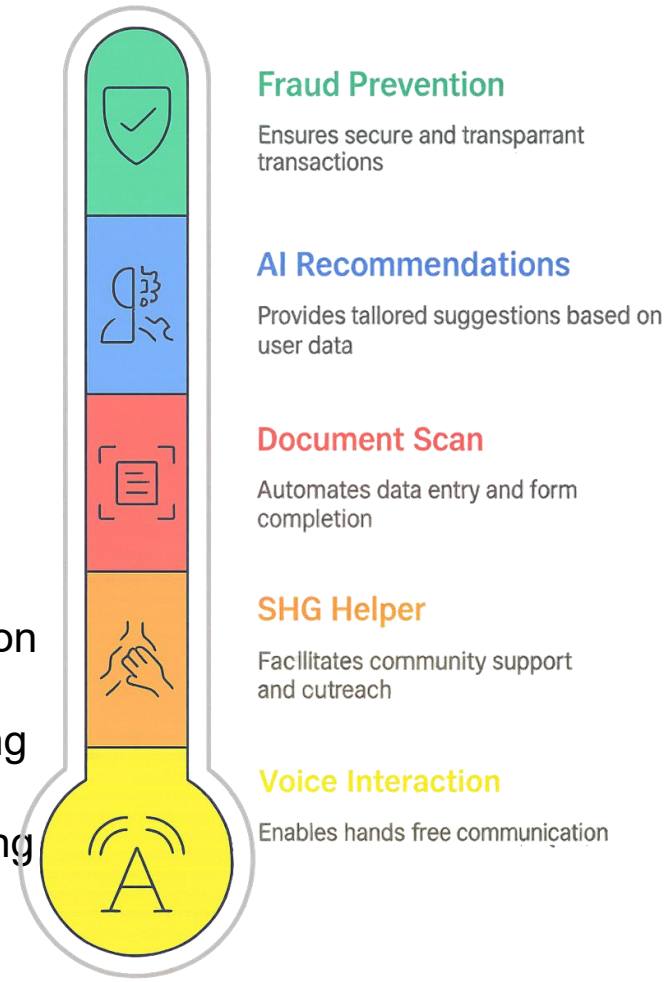

Proposed Solution: Sahayini is an AI-based assistant that helps rural women easily find which government schemes they are eligible for and guides them step-by-step to apply—using voice, simple questions, and WhatsApp support.

Key Features/Functionality:

- AI-based scheme eligibility checker
- Voice assistant in local language
- Document scan & auto-form fill
- Fraud-prevention alerts for safe guidance
- WhatsApp and low-network support
- **Offline Mode:** App stores basic scheme data locally so women can access information without internet.

What Make It Different /Innovative?

- Voice-First, Local-Language Interaction
- SHG & ASHA Helper Mode
- Personalized Recommendations Using AI
- Document Scan + Auto-Form Fill Using OCR
- Fraud Prevention & Transparency

Significance & Benefits

- **Who will benefit and how?**

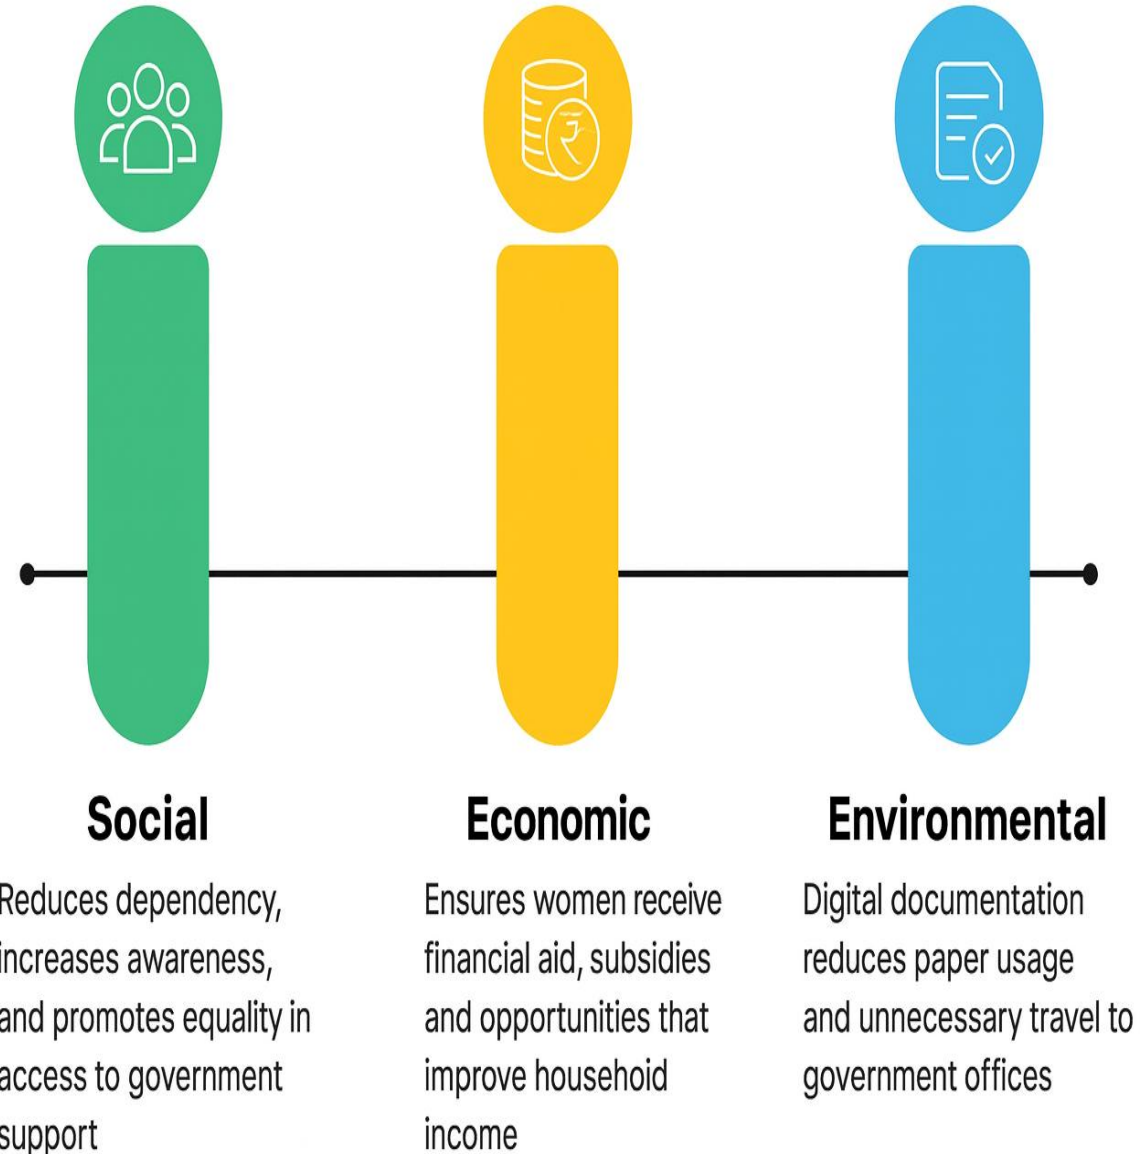

- **Rural women** gain easy access to the schemes they deserve without confusion or middlemen.
- **Low-income families** receive timely financial support, health benefits, and education schemes.
- **SHGs and ASHA workers** get a tool to help multiple women efficiently.

- **Social, economic, or environmental impact.**

- **Social:** Reduces dependency, increases awareness, and promotes equality in access to government support.
- **Economic:** Ensures women receive financial aid, subsidies, and opportunities that improve household income.
- **Environmental:** Digital documentation reduces paper usage and unnecessary travel to government offices.

- **How it aligns with inclusivity and empowerment.**

- Designed for **low-literacy, rural, and marginalized women**, ensuring no one is excluded.
- Voice-based and local-language support makes the platform accessible to every woman.
- Empowers women with **knowledge, independence, and confidence** to use government systems without fear or exploitation.

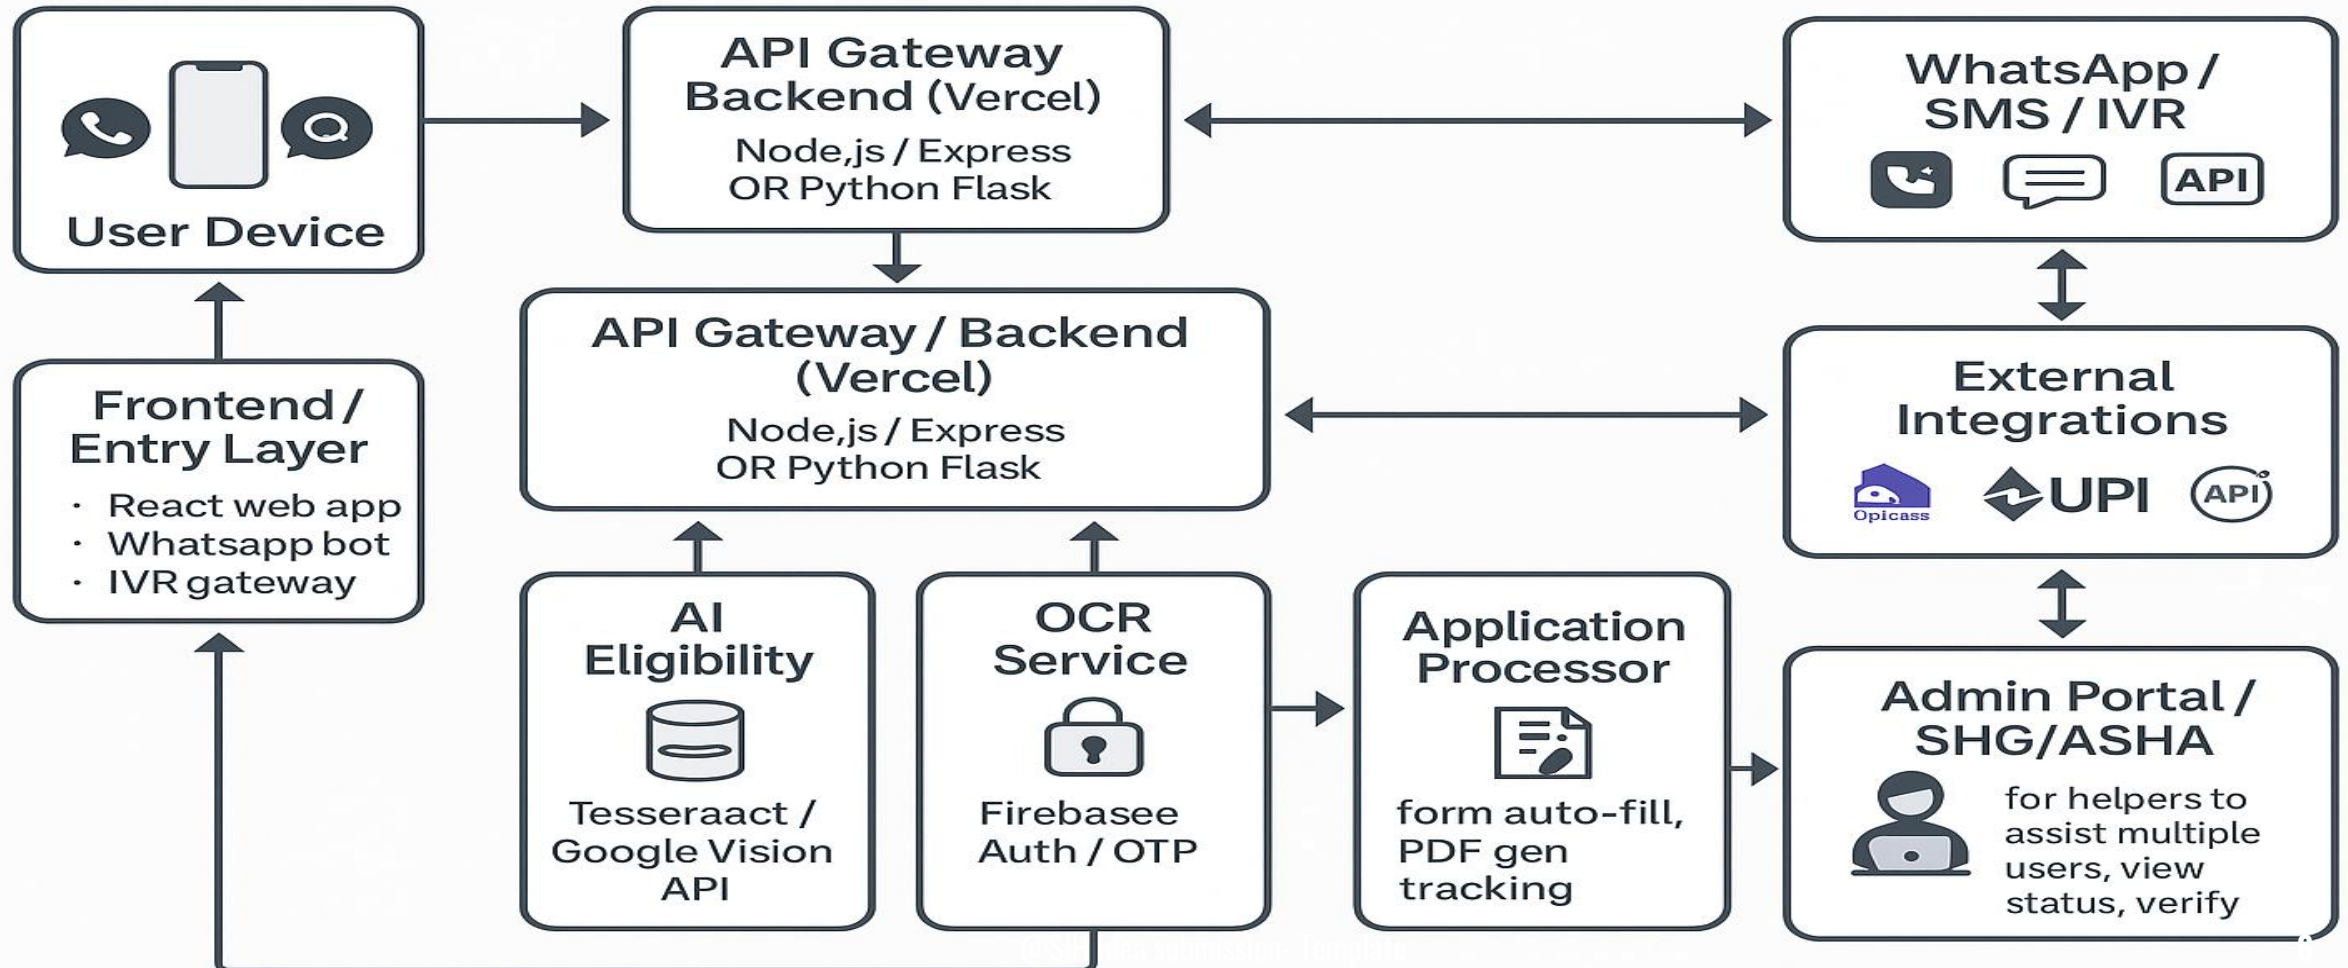

Technical Solution

Component	Technical Direction	Technologies / Tools / Platforms
Frontend	Build a simple, user-friendly interface with local language support	React.js, HTML, CSS, Bootstrap
Backend	Handle eligibility logic, API processing, and data flow	Node.js, Express.js / Python Flask
Database	Store user details, schemes, documents, and status	Firebase / MongoDB
AI Eligibility Engine	Match user inputs with schemes using rule-based AI	Python, JSON rule sets, ML logic
Voice Assistant	Enable speech input and voice guidance	Google Speech-to-Text, Text-to-Speech API
WhatsApp Integration	Provide updates and application support via WhatsApp	WhatsApp Cloud API / Twilio
OCR Document Scan	Extract data from documents for auto-form filling	Tesseract OCR / Google Vision API
Authentication	Simple login suitable for rural users	Firebase Auth / OTP-based login
Hosting / Deployment	Deploy both frontend and backend quickly and reliably	Vercel, Netlify
Version Control	Manage team collaboration and code changes	GitHub
UI/UX Prototype	Create mockups and design screens	Figma / Canva

Approach

Sahayini

Future Scope & Conclusion

• Possible enhancements or scalability.

- Add **multi-language** support for all Indian states.
- Integrate with **DigiLocker** for automatic document verification.
- Enable full **IVR (voice-call based)** assistance for non-smartphone users.
- Expand **database** to include state-specific **schemes** and **seasonal** programs.
- Deploy nation-wide with **SHG/ASHA** partnerships for faster adoption.

• Expected outcomes or vision.

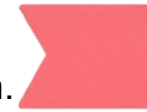

- Rural women gain easier, faster access to **government benefits** without confusion.
- Reduction in fraud and dependency on **middlemen**.
- Improved **financial stability** and **empowerment** at the family and community level.
- A future where every woman can claim her rights through simple, accessible **digital tools**.

• **“Sahayini isn’t just a tool—it’s a step toward a more inclusive future.”**

Possible Enhancements or Scalability

Add multi-language support for all Indian states

Integrate with DigiLocker for automatic document verification

Enable full IVR (voice-call based) assistance for non-smartphone users

Expand database to include state-specific schemes and seasonal programs

Deploy nation-wide with SHG/ASHA partnerships for faster adoption
